

Dartron
Industries, Inc.

October 4, 2007

Dear Dartron Customers, Suppliers and Friends:

Dartron has a new manufacturing arrangement about which I want to inform you. As of October 2007 Larson International in Texas will manufacture the Dartron Cliff Hanger and Zero Gravity Amusement Products. Dartron Parts & Services, Inc. will continue to operate out of its long time facility in Salem, Oregon and will continue to provide replacement parts and technical service support for all products supported in the past plus all Cliff Hangers and Zero Gravities manufactured by Larson. You will notice no change in availability or quality of repair parts and technical service. Our highly experienced team will continue to support your rides. Our telephone numbers will remain the same.

I will still be selling new rides in the carnival and amusement park industries. The only difference is that orders for Zero Gravities and Cliff Hangers will be placed with Jeff Novotny and manufactured at Larson's facility in Texas rather than Dartron's manufacturing plant in Oregon.

I have visited the Larson facility and observed the quality of their manufacturing processes, and I have every confidence that Larson's quality is equal to Dartron's. Our customers will notice no change to the excellent quality that people have come to expect from Dartron.

I will remain active in the parts and service business as well as promoting new ride sales. Albert, Casey and David will remain with the parts and service business as well as several people skilled in the manufacture of Dartron products. We are here to support our customers as always.

I hope you have had a successful season. I will be in Larson's booth at the IAAPA Trade Show in Orlando and at the IAFE meetings in Las Vegas. I hope to see you there.

Best wishes,

J. Robert Coil
